

# Higher Consciousness Apotheosis

**Higher Consciousness Apotheosis** is to **Know Thyself** through a *self-transformative Alchemical transfiguration* process of **Individuation, Actualization** and **Realization** of the **Essence** and **Nature** of **Higher, Truer, Realer Life's** ultimate *purpose* in **Moral Living**, and thereby achieve a *deified evolution* of **"Becoming a God"** with the *benefit, grace, blessing* and *favor* of **Righteous Living** in **Heaven, Paradise, Immortality** and **Eternal Life** through *being* and *embodying* the *ideal potential* of the **Moral Way** of what is **Right, Good** and **True**.

This process requires *self-correction* by having the *courage* to face the *negative, evil, demon, devil, darkness* and *shadow* within, and putting it to *death* through *deconstruction, disassembly, dissolution* and *burning* of these aspects of a *false self* to then engage in continual *self-renewal* as a *phoenix rising from the ashes* to be *resurrected, reborn, purified* and *better* than before.

Symbolism has powerful imagery and should often not be taken literally, but rather as metaphor and analogy to reference one domain of self and reality (or unreality), in order to understand another domain more.

**2 TRUTH LEVEL 2, DERIVED FROM:**

Consciousness = Inner You = "High"  
T2 potential is envisioned from

T2 exists within T1, consciousness exists in T2 exclusively and T1, from consciousness

**1 TRUTH LEVEL 1, DERIVED FROM:**

Existence = Outer Universe = "Low"  
T2 potential is actualized into

Priority of Existence, within it is the Power of Consciousness

**TERRITORIES (Known & unknown) MAP OF REALITY**

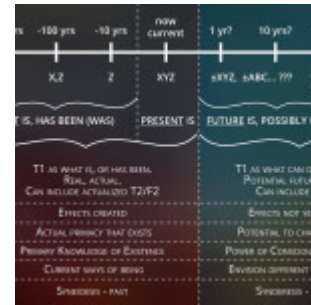

**CERTAINTY OF ACTUALITY (MANIFESTED)**

- what is, reality as the current condition
- from objective existence (physical & metaphysical)

**POSSIBILITY OF POTENTIALITY (UNMANIFESTED)**

- what could be, "absolute" idea compared to "relative" changing reality
- from subjective imagination, "unconscious"

From the consciousness imagination factory... What is potentially generated is based on what is... to create into the future, from consciousness into reality

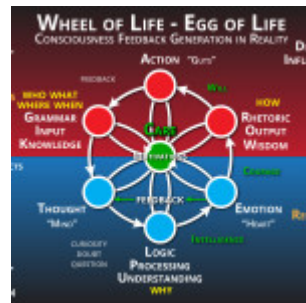

**EXISTENCE** DEEPER REALITY  
CONSCIOUSNESS DEEPER GROWTH

**CONSCIOUSNESS (THOUGHT, EMOTION)**

**AGENCY VS. PROBABILISTICALLY NATURAL CAUSATION CAPACITY VS. NO SELF-DETERMINATION**

<b>BUSINESS CHANGE</b> Involuntary Inevitable	Human animals Nonhuman animals (if there are aliens...)	<b>FREE WILL CAPACITY</b> Self-Determined Capacity to Choose Free Will & Control Voluntary
<b>EXISTENCE CHANGE</b> Inevitable	Animals: Plants Cells Atoms Subatomic Quantum Mechanical Processes	<b>PROBABILISTIC PROCESSING</b> No Self-Determined No Capacity to Choose No Free Will or Control Involuntary

Animals have explicit hunger or other needs

**AUTOMATED "PROGRAMMED" PROCESSING & ORGANIZED SYSTEMS FUNCTIONALITY (EXTERNAL UNIFORMITY)**

Involuntary Processing  
(if/then, 1:1, 1:many (ratio))  
Limited potential response.  
Orderliness of "programmed" functionality.

Trigger a method, function, procedure, from event listener or sensor, ignores invalid input, can't use it.

usually involves if/then to test the presence of a condition, through comparison. "Programmed" ratio to automate functions. No free will, no consciousness. Physical change, apt, transform, grow.

**FREE WILL CONSCIOUSNESS PROCESSING & OUTPUT INFINITE POTENTIAL POSSIBILITIES (INTERNAL MULTIVERSITY)**

(In)Voluntary Processing  
(if/then, 1:1, 1:many, 1:∞)

With valid ratio / rationality, reason, logic / intuition, understanding, or not with invalidity, irrationality, chaos, etc. Unlimited potential response.

Consciousness can respond with conditioning (involuntary), or diverge with free will. Can also respond in accordance, alignment, union, with order of consistency, integrity, noncontradiction (logic), or not and diverge chaotically. Mental change/adapt/transform.

**REFLECTIVE**

Reason/rational inference  
Construction, construction, voluntary.

Intuitive justification of arguments/data, modality, attachment, conscious conditioning.

Consciously aware voluntary willful form of reflection and processing. Intuition proper, is a methodical data collection/aggregation processing. Therefore to contradiction.

Reason/rational inference  
Conscious construction  
Willed, Voluntary.  
Secondary.  
Makes sense.  
Conclusion via intuition while aware of arguments/data.  
Corrective modality. Truthful communication.

Voluntary alignment or contradiction with reality

**REASON RATIONALITY**

Controlled, willed, voluntary  
Time developed  
Conscious aware processing  
Active logic

**INTUITION**

Uncontrolled, automatic, instant  
Un/Subconscious unaware  
Passive logic

Involuntary alignment or contradiction with reality

**PERSISTENCE, PERSISTENCE, KNOWLEDGE**

repetition, they demonstrate a form of persistence recognized as knowledge. Persistence and repetition behind "science". An apple persists. Persistence of knowledge can persistently be repeated to others. If it's transitory in time, then it can be expressed while no longer persisting into the future.

really exist, or was it something I only thought reality or exist only in your consciousness...)

ogy of science tests the repeated existence of a method for the duration of the method that tests for whether it will persistently produce the existence of... also persists, like a repetition, that is constant nonpersistence.

**AND KNOWLEDGE**

something cut, divided and separated for it to be and dissected, compared and contrast to something that is now cut, requires collecting the pieces to a contradictory manner. Logic is from the PIE root. Patterns are detected by comparing data collected. Required for greater vision, awareness and patterns.

of consciousness can develop towards the open higher transcendental consciousness and the Eye of Knowledge and vision of the past provides a way to prove the future. This is the power to transcend and social conditioning/programming.

**ION, PERSISTENCE, LIFE**

constructs engage in replication and renewal for their being, compared to simple elemental components in themselves and not producing the later emergent consciousness. Higher order order functionality, such as consciousness, the bio-construct / being, allows us to see proportion thing and another, both external (world) and internal.

being is a repeatability of being. Repeatability is what something is now, compared to what it was. What exists, is repeatable, seen as the persistence. It is knowledge of what exists, because it exists.

**man Consciousness Development**

**EXTERNAL AWARENESS** -  
 - reflexive, contemplative, non-reflective, axiomatic, intuitive, "feels-right".

**INTERNAL SELF AWARENESS** -  
 - reflexive, contemplative, reflective, self-corrective, evolutionary, consciousness to change, evolve, grow and adapt into the future (synderesis), not re-learn, learning from the past (syneidesis).

**ING CHANGE**

come from self, or environment. We can be pushed by outside factors, and also develop internal analysis to re-define ourselves into change as well.

of being towards becoming something else. This requires capacities within higher order consciousness. Self-transformation must be voluntarily developed. Forced changes can result from external pressure, the world, reality, that is not your consciousness (being) putting pressure on you to affect a change.

biology, is persistence as survival. Everyone, even animals. That is basic default lower life, simply persisting. Truer Living, is based in consciousness, ideal better, more right, more good, more true, more live for your own survival.

istence (being actual) and the Power of Consciousness. There is no becoming (potential), without first existing (potential lower or higher), without first existing. To have a consciousness like we have (or to be a body like we have in existence. The body comes after it. Existence comes before consciousness.

esent (are, is, stationary), but are living for the future. can be, mobile). Animal life is mostly focused in the present, however human animals have more potential beyond the immediacy of the current condition. It is more preferable, optimal, better and improving into the future. Imagination, idea, ideal, surreal, multiverse, "spirit". All the imagery, imagination, "ritual" in which we do things) that push and motivate symbolism, imagery and language.

"The Holy Ghost; the Holy Spirit; wings, wind, breath, unseen, immaterial, hidden, mind, invisible; is consciousness, "spirit" life potential. From inner consciousness there is perception, of which the most important is morally to act and live rightly. This is how we self-determine, character, disposition and behavior of ourself.

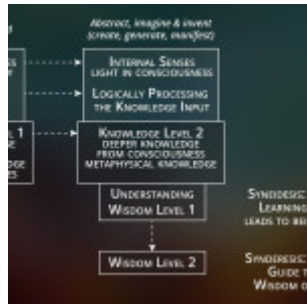

cluding the unconscious (all the many "spirits" that motivate behavior), can decrease or increase to direct and improve moral living. Willful consciousness, unconsciously unaware motivations, drives and actions in which we do things, the "deities"/"gods" within.

primarily a symbol to refer to an aspect of you, the immaterial unseen internal part of you that determines, the will power to act that varies in degree of complexity of the bio-animal body that produces a "soul", as a drive or embodiment to act, is tied and is related to the higher moral dimension to act to create a wrong is not courage. The phrase "immoral, or uncaring, person. This is the second spirit", "soul", the higher moral dimension.

ness/"spirit" is the power of becoming something somewhere, the will to determine value and end journey towards a purpose, goal, end, objective, to pay attention to the current present actual potential that can be created. Ultimately, it's "ritual" through self-correction.

usness, con-science, is the compass within that is used to determine moral value and a higher, truer, more power of continual self-renewal through self-correctional consciousness by facing the negative/improvement. vision to see the morality of the past and learn from it, which is required for the power of synderesis to learn from moral action to live by in the future. Most of life is about rising above our current condition and ways of living and is a complex processing capability of high order.

conscious, involuntary, programmed, automatic. These are the baser biological and sociological living and environment. The "spirit" of consciousness, awareness is the power potential for higher living where reborn and reborn as a truer, higher, realer version more moral "spiritual" living being.

**& FUTURE VISION - SYNEDESIS & SYNDERESIS**

**FROM THE PAST AS A GUIDE TO WATCH OVER TO NOT REPEAT MISTAKES, TO CREATE BETTER**

is passing the past acts (as synderesis) together, and watch over, 'keep watch'.

SYNDESESIS (SYN) -  
 - conscience as a guide  
 - action (as opposed to inaction)  
 - from syn 'with', at watch over, 'keep watch'.

for morality in the past is knowledge, eidetical, future actions is about watching over what we do. Comes from the past to guide us into the future, to work and live for the future.

the past controls the future. He who controls the past controls the future.  
 - George Orwell

**PROVIDENCE (All, Same, One)**  
 - One Eye  
 - supposition, foreknowledge, foresight, foresight  
 - from pro- "ahead" + syneidesis "to see"  
 - supply, act with foresight

**SYNDERESIS**  
 - to fabricate action (as opposed to syneidesis) to watch over

ing, manifesting, creating & becoming in time. Providence, foreknowledge, is about behavior and action based on knowing what is to happen, from a causal relation to predict it. A guide is about our future actions. We watch over the future with ourselves. To watch and guard is also to protect. We protect, syneidesis, to determine what future we are creating with things, to change with foresight. The Eye of Providence, fate, etc., is an uncovering reality to recognize patterns of causality, and see what will come next. The transcendental consciousness that is, if we choose to engage in this voluntary willful higher order power of Providence is the vision of wisdom from acquiring the lightness power of being like a "god" to rule our own fate, destiny & future.
