

Trivium Method of Thinking and Learning

The Trivium Method

is a recognized aspect of how consciousness processes reality. The basics are described as a 3-step process:

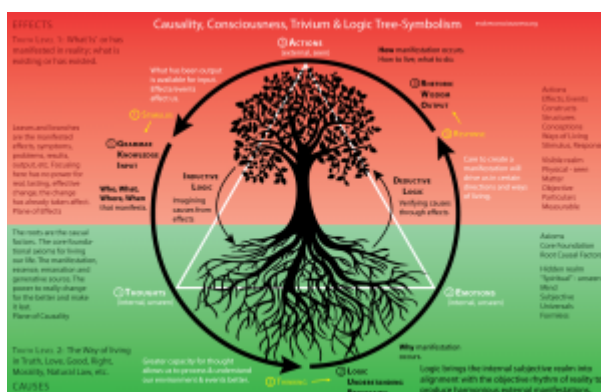

1. Grammar – Input – Knowledge
2. Logic – Processing – Understanding
3. Rhetoric – Output – Wisdom

This is a basic functionality of higher order consciousness that human animals possess. The degree of functionality in this Trivium Method of thinking and processing reality can be developed further. We walk these three paths in consciousness in order to live.
